

Perfection in Timber.

Getting better every day: HS Timber Productions Sebes sawmill

HS Timber Productions started production in 2003 as the Group's first sawmill in Romania. Today, it produces several types of timber and pellets, briquettes and green energy as by-products. It was the first Greenfield investment of the HS Timber Group in Romania and it set the tone for all the other sawmills, which were also built from the ground up: a specially designed industrial platform, close but separated from residential areas, in order to support local economic development with minimal environmental impact.

"The Sebes sawmill that in 2003 started HS Timber Productions Romania proved that Romania's wood processing industry can be turned modern, efficient, sustainable and environment-friendly."

Dan Bănac
General Manager
HS Timber Productions

HS Timber Group is one of Europe's leading wood processing companies. The company operates three modern sawmills and two panel factories in Romania as well as a sawmill in Kodersdorf, Germany. Its high-quality timber products are available in more than 70 countries worldwide.

Did you know that...?

... **planed timber** is primarily used in construction, for both interior and exterior works? It is ideal for fencing, building frames, or making garden furniture.

... **sawn timber** can be used for carpentry products, windows and doorframes that require painting, exterior lining and interior panels?

Sebes sawmill: facts and figures

Opened in	2003
Total investments	115 million Euro
Plant size	50 ha
Cutting*	1.45 million m ³
Planing*	580,000 m ³
Kiln drying*	880,000 m ³
Pellets*	189,000 t
Produces	sawn timber, planed timber, glued timber, profiled timber, pellets, green energy
Processes	fir, spruce, pine
Exports to	Japan, USA, the Middle East

* Production capacity per year

Unique security architecture: GPS tracking system Timflow

HS Timber Productions only purchases wood from 100% secure sources. We use the Timflow GPS system in Romania, which monitors each saw log truck's exact transport route, from the loading point to the mill gate. This is a voluntary system, surpassing all legal requirements by far. All collected data, including full GPS maps of the route and photos of the loaded trucks before departure, is public on

www.timflow.com.

CSR at a glance: Tomorrow's Forest

HS Timber Productions invests one million Euro in replanting degraded forest land. Stretching over seven years, *Tomorrow's Forest* - the reforestation project run together by HS Timber Productions, the Association of Forest Administrators (AAP) and the Stefan cel Mare University of Suceava - aims at planting one million seedlings in Romania.
