

Perfection in Timber.

Getting better every day: HS Timber Productions Siret factory

Edge glued panels, finger-jointed products and briquettes are manufactured in the **HS Timber Productions** factory in Siret, in Northern Romania, serving markets all around the world.

The factory was taken over and modernized by HS Timber Group in 2009. Today, the factory is the biggest private employer in Siret and the biggest local tax payer.

"The Siret factory uses high quality spruce and pine timber to provide high added value products, serving the most demanding DIY markets in the entire world."

Dan Bănaciu
General Manager
HS Timber Productions

HS Timber Group is one of Europe's leading wood processing companies. The company operates three modern sawmills and two panel factories in Romania as well as a sawmill in Kodersdorf, Germany. Its high-quality timber products are available in more than 70 countries worldwide.

Did you know that...?

... *edge-glued panels* are primarily sought after in retail, furniture and construction industries at a worldwide level?

... *finger-jointed timber* can be invaluable when fixing tables and chairs and can also be used in floor boards, timber roof, and door construction?

Briquettes*	30,000 tones
Produces	edge glued panels, finger-jointed timber, briquettes
Processes	softwood timber
Exports to	USA, Canada, France, Austria

* Production capacity per year

Unique security architecture: GPS tracking system Timflow

HS Timber Productions only purchases wood from 100% secure sources. We use the Timflow GPS system in Romania, which monitors each saw log truck's exact transport route, from the loading point to the mill gate. This is a voluntary system, surpassing all legal requirements by far. All collected data, including full GPS maps of the route and photos of the loaded trucks before departure, is public on www.timflow.com.

CSR at a glance: Tomorrow's Forest

HS Timber Productions invests one million Euro in replanting degraded forest land. Stretching over seven years, *Tomorrow's Forest* - the reforestation project run together by HS Timber Productions, the Association of Forest Administrators (AAP) and the Stefan cel Mare University of Suceava - aims at planting one million seedlings in Romania. Further information can be found on www.padureademaine.ro/en/.
