

Perfection in Timber.

Getting better every day: HS Timber Productions Sebes sawmill

HS Timber Productions started production in 2003 as the Group's first sawmill in Romania. Today, it produces several types of timber and pellets, and green energy as by-products. It was the first Greenfield investment of the HS Timber Group in Romania and it set the tone for all the other sawmills, which were also built from the ground up: a specially designed industrial platform, close but separated from residential areas, in order to support local economic development with minimal environmental impact.

"The Sebes sawmill that in 2003 started HS Timber Productions Romania proved that Romania's wood processing industry can be turned modern, efficient, sustainable and environment-friendly."

Dan Bănac
General Manager
HS Timber Productions

HS Timber Group is one of Europe's leading wood processing companies. The company operates two modern sawmills, a post and beam production, and one blockboard factory in Romania as well as a sawmill in Kodersdorf, Germany and one in Luvia, Finland. Its high-quality timber products are available in more than 70 countries worldwide.

Did you know that...?

... **planed timber** is primarily used in construction, for both interior and exterior works? It is ideal for fencing, building frames, or making garden furniture.

... **sawn timber** can be used for carpentry products, windows and doorframes that require painting, exterior lining and interior panels?

Sebes sawmill: facts and figures

Opened in	2003
Plant size	53 ha
Cutting (log input)*	1.45 million m ³
Planing*	580,000 m ³
Kiln drying*	880,000 m ³
Laminated products (input)*	52,000 m ³
Pellets*	198,000 t
Hot water boiler*	20 MW _{therm}
Combined heat and power plant*	10,9 MW _{el} /32,6 MW _{therm}
Produces	sawn timber, planed timber, glued timber, profiled timber, pellets, green energy
Processes	fir, spruce, pine
Exports to	USA, Romania, Japan, China, Saudi Arabia (main markets)

* Production capacity per year

Unique security architecture: GPS tracking system Timflow

HS Timber Productions only purchases wood from 100% secure sources. We use the Timflow GPS system in Romania, which monitors each saw log truck's exact transport route, from the loading point to the mill gate. This is a voluntary system, surpassing all legal requirements by far. All collected data, including full GPS maps of the route and photos of the loaded trucks before departure, is public on www.timflow.com.

CSR at a glance: Tomorrow's Forest

HS Timber Group and the Tomorrow's Forest Foundation have forged a strategic partnership for joint implementation of environmental and social projects that promote responsible development of Romanian forests and benefit Romanian forestry communities. By entering into this strategic alliance, the HS Timber aims to implement the company's CSR commitment more purposefully and more effectively. Further information can be found on www.padureademaine.ro/en/.
